

Study on Pediatric Experiences and Adult Health

THIS STUDY IS NOW RECRUITING.

This study examines the relationship between pediatric experiences and adult health.
This is a 15-minute online survey.

Do You Remember Any of the Following From Your Childhood?

- Undergoing a procedure called a VCUG (voiding cystourethrogram)
- Having UTIs (urinary tract infections) as a child, then having your bladder tested

You Qualify If You:

- Are 18+ years old
- If you received medical care as a child, most (or all) of your medical care took place in the United States.

Participation Involves:

- Completing a 15-minute-long online survey about your health.

Potential Benefits:

- Participants may be eligible for compensation.
- Participation in this study may improve your knowledge of your own medical history.
- Participation in this study may provide insights that improve pediatric care.
